

BROCK® Hopper Valve for Easy Access to Stored Materials

Brock's unique Hopper Valve Kit gives an alternate way to easily get small amounts of feed or other stored materials out of a hopper-bottom bin or silo. This easy access is important when a small quantity of the stored material is needed at a location not serviced by the auger system.

Add a lock to prevent accidental discharge.

The optional Hopper Valve Kit's simple, hand-operated slide gate permits easy discharge of small amounts into a bucket or wheel-barrow. Quickly and easily draw material out for samples or get feed for a small group of animals in another location.

- Simple to install
- Easy to operate
- Fits any new or existing BROCK® or CHORE-TIME® Feed Storage Bins/Silos.
