New GrainDrive™ T1000 Tube Conveyors join Brock's full line of GrainDrive™ Series chain conveyors. Like all Brock grain handling equipment, the T1000 is designed to install easier, work harder and last longer. The GrainDrive T1000 Tube Conveyor fits a middle role where you need more capacity and speed than a standard auger, while offering lower overall cost and steeper inclines than a standard or curved incline drag conveyor.
GrainDrive™ T1000 Tube Conveyors

**Gentle grain handling.**
A Brock tube conveyor is an upgrade for a roof auger, transfer auger or dryer auger. It is gentle on grain and moves more bushels per hour with less energy cost than augers. With capacities up to 10,000 bushels per hour, you can move grain quickly and efficiently.

<table>
<thead>
<tr>
<th>Grain Capacities</th>

<tbody>
<tr>
<td><strong>Model</strong></td>
</tr>
<tr>
<td>8 in. (203 mm)</td>
</tr>
<tr>
<td>10 in. (254 mm)</td>
</tr>
<tr>
<td>12 in. (305 mm)</td>
</tr>
</tbody>
</table>

*Capacities in bushels per hour are based on dry, free-flowing corn. Inclined applications will affect capacity.

**Installation flexibility.** Inclines are supported up to 45° with inlets and discharge transitions available in 0°, 30° and 45° increments to optimize grain flow. The system can be driven from the head or tail section for installation flexibility.

**Easy maintenance.** The GrainDrive T1000 is designed so drives and chains are maintained in the same location. That means for most applications using tail drives, critical chain tensioning can be completed from the ground.

**Intermediate inlet and discharge.** The Brock GrainDrive Tube Conveyor can easily be configured for multi-bin grain systems. It features modular intermediate inlet and discharge sections. Unlike typical designs, Brock discharges feature roller bearings for easy movement and jam-free operation.

**Made for heavy-duty applications.**
The Brock GrainDrive T1000 is designed to move large amounts of grain using high horsepower motors and strong components like Dodge SCM bearings. Brock also uses upgraded spherical S2000 head bearings for applications up to 75 horsepower that require longer runs, larger diameters or steeper inclines.
Brock Solid® is our guarantee of trusted reliability you can count on day in and day out. It is the guarantee of unmistakable quality, built to last year after year. It is the same guarantee we founded the company on back in 1957. That focus on providing dependability has resulted in the full line of grain facility solutions that are available today.

You will find the quality you have come to expect and the trusted integrity you deserve. Brock Solid delivers. Always has, always will.

**Storage**
- EVEREST® & On-Farm Grain Bins
- EVEREST® & Wet Holding Hopper Bins
- Temporary Storage
- Bin Access Doors
- Grain Aeration Floors

**Handling**
- Grain Sweeps
- Grain Conveyors
- Bin Unloading Systems
- Bucket Elevators
- Distributors & Accessories

**Drying & Conditioning**
- Low Profile Grain Dryers
- Tower Grain Dryers
- Centrifugal & Axial Fans
- Heaters
- Controls

**Structures**
- Catwalks
- Bucket Elevator Towers & Stairways
- EVERLOC® Roof Mount System
- Support Towers
- Slot & Tab Construction
